Who We Are

Trading Master provides fully automated Trading Bots that will place all trade entries without any manual intervention in your own Trading Account based on proven strategies. Trading strategies built on statistical and mathematical models have historically offered higher returns than their benchmarks and mutual funds. We at Trading Master focus on Educate & Execute, where we educate the users that algo trading is not money making machine and importance of rule based trading, so we built mathematical & statistical models that can provide better returns and we completely automated it, so the system will place entry, stop loss & targets. automatically based on the strategy.
